BEC-KITS Nr. 30c Den Haag P.C.C. Trailer Conversion Kit

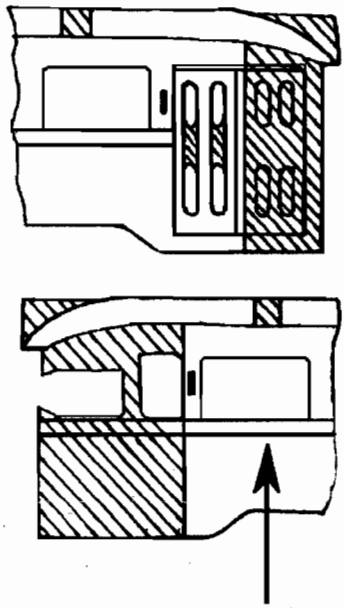

BEC-KITS kit 30 is a model of the Series 1100 P.C.C. cars. By carefully removing the raised beading lines on the waist area of the car body, it is possible to model the Series 1200 and 1300 cars. Den Haag made motorised trailer P.C.C. cars in the series 2101-2130. These were similar to the 1300 series with the driving position removed and replaced with a shorter rounded front section.

This conversion kit contains four parts which can be used to convert a BEC-KITS number 30 Den Haag P.C.C. car into a representation of the P.C.C. motorised trailer cars. We recommend that the modeller obtains a colour photograph of the prototype to determine the exact car to be modelled. Study the drawings carefully, read the instructions and have a dry run to familiarise yourself with the various parts. Assemble the kit with a modern, quick-drying epoxy resin glue or a Cyanoacrylate superglue. This kit can be soldered together, **BUT** this is not recommended unless you are **VERY** experienced with a temperature-controlled soldering iron.

Additional assembly instructions

1 Carefully remove the shaded areas from the front of the right hand and left hand body sides. Open out the vertical windows in all the doors to give single long windows.
2 Carefully remove the route and number boxes from the front of the roof to leave a smooth roof profile.
3 Carefully shorten the roof by about 4mm in the constant roof profile region above the first window.
4 Carefully remove the waist beading lines from the body sides and the car rear.
5 Discard the original car front end and front floor.
6 Build the model as in the original instruction with the two additional front parts added to the sides, the new blank car front and the new front floor.

Remove waist beading lines

Painting Humbrol colour

Later HTM livery:

Yellow	24 or 69	Exterior of car body with no coloured stripes
Medium Grey	5 or 27	Car sides below stripe 'B' on drawing
Medium Grey	5 or 27	Complete roof
Light grey	40	Car interior
Dark Grey	27	Front lifeguard, wheel guard, brake gear
